UNDERSTANDING THE HEALTHY KIDS COLORADO SURVEY REPORTS

Background

The [Healthy Kids Colorado Survey](#) (HKCS) collects anonymous health information from middle and high school students throughout the state. The HKCS is conducted during odd-numbered years, most recently in the fall of 2019. More than 100,000 students in over 500 middle and high schools participated in the fall 2019 survey. The questionnaire measures a wide range of health behaviors and outcomes that affect the health of young people including: physical activity, nutrition, health care, bullying, mental health, tobacco and substance use, sexual health (high school only), and family and school protective factors. The HKCS is informed by the Colorado Departments of Public Health and Environment (CDPHE), Education (CDE), Human Services (CDHS), and Public Safety (CDPS). The survey is administered by Colorado School of Public Health at the University of Colorado Anschutz Medical Campus.

Questionnaire, Parental Consent, and Survey Administration

The majority of the HKCS questions are drawn from the Centers for Disease Control and Prevention (CDC) Youth Risk Behavior Surveillance System (YRBSS), the nation's largest adolescent health survey which has been ongoing for more than 25 years. Other questions in the HKCS have been added with community input to meet additional data needs in Colorado.

The questionnaire is available in English and Spanish, consists of 70 questions, and takes about 45 minutes, or one class period to complete. Starting in 2019, students are able to complete the survey either online or by paper and pencil, depending on school or district preference. Teachers are given instructions to provide to students that emphasize the anonymous and voluntary nature of the survey. Parental consent procedures are followed according to each district's guidelines, with a minimum of two weeks notification in advance of the administration date.

The HKCS selects a sample of schools to represent the state of Colorado. The HKCS is also available to other schools at no cost. Many schools choose to participate in order to receive local data to track important health behaviors and protective factors. Within selected schools, a sample of classrooms is selected to participate in order to minimize the time commitment from schools. If a parent chooses not to allow their child to participate, or if the student declines to participate, they are asked to sit quietly at their desk and work on other school work.

EXAMPLE: How to Read a Table

A. Health behavior

B. Estimate

C. Total number of student responses

2019 HEALTHY KIDS COLORADO SURVEY RESULTS
XXX Middle School

Number of Responses: 350

Table 2. Percentage of students who described themselves as slightly or very overweight

		Percentage (%)*	95% Confidence Interval
Sex	Total	25.8	(22.5 - 29.2)
	Female	27.5	(22.7 - 32.3)
	Male	24.7	(20.6 - 28.7)

D. 95% confidence interval

A. Health behavior includes the table number and a description of the behavior being reported.

B. Estimate or Percentage: Percentage of students who reported a given behavior or answer. A period (.) appears whenever results meet the suppression criteria and are not shown to protect student confidentiality.

C. Total number of student responses: The number of students in the school or district who answered the question being reported. Some students may have chosen to skip some questions, for a variety of reasons.

D. 95% confidence interval: These numbers define the range that most likely contains the true percentage for your school or district. These intervals are also called “margins of error” and indicate the precision of the estimate – a larger range indicates less precision, a smaller range indicates more precision.

Key Definitions

Weighting: The results in the current report are adjusted (“weighted”) so that the answers can represent all students in your school or district. The process of weighting takes into account each participating student’s probability of selection and matches the participant group to the total enrollment by grade, sex, and race/ethnicity.

Response rate: Response rate is the total number of students who participated in the survey divided by the number of students randomly chosen to take the survey. Generally, the higher the response rate, the more confidence that the survey results reflect the student population. Student response rates of 80% or higher are very desirable and increase confidence that the results are representative of the entire student population.

Confidentiality: In order to protect confidentiality, student responses are not released if they might allow someone to identify individual students. A period (.) appears whenever results meet certain suppression criteria used to maintain confidentiality. Our suppression criteria include results of 0% or 100%; results where the numerator has fewer than 3 students (e.g., the number of students who answered ‘yes’), or the number in the denominator is 30 or fewer (e.g., the number of students who answered the question).

Considerations When Using the Report

The results of your school or district can be compared to the state or regional estimates (to be released in the Summer of 2020). When comparing a school or district estimate to a regional or state estimate, examine the 95% confidence intervals. If they overlap, there is no scientific evidence to believe the estimates are different. If they do not overlap, there is high confidence that the estimates are different (“statistically significant”). For statistically significant differences, judgment is needed to decide whether the size of the difference is meaningful and important.

Technical Assistance

The HKCS team at the Colorado School of Public Health can help you:

- **Understand your report.** We are happy to meet or talk with you about any aspect of your report including understanding the nuts and bolts to identifying the most important indicators.
- **Conduct additional and customized analysis of your data.** We are happy to talk with you about custom analysis. Please note that additional analysis can sometimes be limited based on the sample size. As a general rule of thumb, if there are fewer than 100 respondents, there is a limited number of categories that can be used to look at results. Several hundred respondents are typically necessary for estimates with smaller subgroups. Therefore, custom analysis may be possible with district-level data but not always with school-level data.
- **Prepare a presentation of the data.** We can create a customized Power Point presentation according to your needs.
- **Present or co-present your data.** We are available to travel to your location or be available by webinar/teleconference.

For further assistance please contact the Healthy Kids Colorado Survey team at CSPHSurveyTeam@ucdenver.edu.

TABLE OF CONTENTS

Introduction

Background	i
Questionnaire, Parent Consent, and Survey Administration Background	i
EXAMPLE: How to Read a Table	ii
Key Definitions	ii
Technical Assistance	iii

Demographics

Table 1. School Demographics	1
------------------------------------	---

Physical Activity and Sedentary Behaviors

Table 2. Percentage of students who were physically active for a total of at least 60 minutes per day on five or more of the past seven days.....	2
Table 3. Percentage of students who attended physical education (PE) classes on one or more days in an average week	3
Table 4. Percentage of students who played on one or more sports teams during the past 12 months	4
Table 5. Percentage of students who played video or computer games, spent time on social media, or used a computer or phone for something that was not school work for three or more hours on an average school day.....	5
Table 6. Among students who use social media, the percentage who think it sometimes or usually makes them feel worse	6

Nutrition

Table 7. Percentage of students who drank a can, bottle, or glass of soda or pop on one or more time per day during the past seven days	7
Table 8. Percentage of students who drank a sports drink, energy drink, or other sweetened beverage one or more times in the past seven days	8
Table 9. Percentage of students who ate fruit one or more times per day in the past seven days	9
Table 10. Percentage of students who ate vegetables one or more times per day in the past seven days.....	10
Table 11. Percentage of students who ate breakfast on all of the past seven days.....	11

Bullying

Table 12. Percentage of students who had ever been electronically bullied	12
Table 13. Percentage of students who had ever been bullied on school property during the past 12 months	13

Table 14. Among students bullied on school property, the percentage who were bullied in a classroom.....	14
Table 15. Among students bullied on school property, the percentage who were bullied in a hallway or stairwell.....	15
Table 16. Among students bullied on school property, the percentage who were bullied in the locker room or bathroom	16
Table 17. Among students bullied on school property, the percentage who were bullied in a cafeteria or lunch room.....	17
Table 18. Among students bullied on school property, the percentage who were bullied on a bus or at a bus stop	18
Table 19. Among students bullied on school property, the percentage who were bullied outside before school.....	19
Table 20. Among students bullied on school property, the percentage who were bullied outside after school.....	20
Table 21. Among students bullied on school property, the percentage who were bullied outside during lunch or break	21
Table 22. Among students bullied in the past 12 months, the percentage who were called names or insulted, had rumors spread about them, were pressured to do something, or were excluded	22
Table 23. Among students bullied in past 12 months, the percentage who were pushed, threatened or had property destroyed.....	23
Table 24. Percentage of students who had been teased or name called because of their perceived sexual orientation during the past 12 months	24
Table 25. Percentage of students who saw someone else being bullied on school property in the past 30 days.....	25

Safety/Violence

Table 26. Among students who ride a bicycle, the percentage who never or rarely wear a bicycle helmet	26
Table 27. Percentage of students who never or rarely wear a seat belt while riding in a car.....	27
Table 28. Percentage of students who ever rode in a car driven by someone who had been drinking alcohol	28
Table 29. Percentage of students who did not go to school on one or more of the past 30 days because they felt they would be unsafe at school or on their way to or from school.....	29
Table 30. Percentage of students who have ever been in a physical fight.....	30
Table 31. Percentage of students who ever carried a weapon such as a gun, knife, or club.	31

Mental Health

Table 32. Percentage of students who felt so sad or hopeless almost every day for two weeks or more in a row during the past 12 months that they stopped doing some usual activities	32
Table 33. Percentage of students who ever seriously thought about killing themselves	33
Table 34. Percentage of students who ever made a plan about how they would kill themselves.....	34
Table 35. Percentage of students who ever tried to kill themselves	35
Table 36. Percentage of students who have an adult to go to for help with a serious problem.....	36

Tobacco

Table 37. Percentage of students who had ever tried cigarette smoking, even one or two puffs.....	37
Table 38. Percentage of students who ever smoked a whole cigarette before the age of 11	38
Table 39. Percentage of students who smoked cigarettes on one or more of the past 30 days	39
Table 40. Percentage of students who feel it would be sort of easy or very easy to get cigarettes if they wanted.....	40
Table 41. Among students younger than 16 who reported current cigarette use, the percentage who usually got their own cigarettes by buying them in a store or gas station during the past 30 days.....	41
Table 42. Percentage of students who think people who smoke one or more packs of cigarettes per day have a moderate or great risk of harm	42
Table 43. Percentage of students who think their parents or guardians would feel it is wrong or very wrong if they smoked cigarettes.....	43

Vapor Products

Table 44. Percentage of students who have ever used an electronic vapor product	44
Table 45. Percentage of students who used an electronic vapor product in the past 30 days	45
Table 46. Percent of students who think people who use electronic vapor products every day have a moderate to great risk of harm	46
Table 47. Percent of students who think it is wrong or very wrong for someone their age to use electronic vapor products.....	47

Alcohol

Table 48. Percentage of students who had ever had a drink of alcohol, other than a few sips.....	48
Table 49. Percentage of students who had their first drink of alcohol, other than a few sips, before the age of 11	49
Table 50. Percentage of students who had at least one drink of alcohol on one or more of the past 30 days	50
Table 51. Percentage of students who thought five or more out of every 10 students in their grade drank alcohol in past 30 days	51
Table 52. Percentage of students who feel it would be sort of easy or very easy to get alcohol if they wanted	52
Table 53. Percentage of students who think people who drink one or two drinks nearly every day have moderate or great risk of harm.....	53
Table 54. Percentage of students who think it is wrong or very wrong for someone of the same age to drink alcohol regularly (at least once or twice per month).....	54
Table 55. Percentage of students who think their parents or guardians would feel it is wrong or very wrong if they drank alcohol regularly (once or twice per month)	55

Marijuana

Table 56. Percentage of students who had ever used marijuana.....	56
---	----

Table 57. Percentage of students who tried marijuana for the first time before the age of 11	57
Table 58. Percentage of students who used marijuana one or more times during the past 30 days	58
Table 59. Percentage of students who thought five or more out of every 10 students in their grade used marijuana in past 30 days	59
Table 60. Percentage of students who feel it would be sort of easy or very easy to get marijuana if they wanted	60
Table 61. Percentage of students who think people who use marijuana regularly have moderate to great risk of harm	61
Table 62. Percentage of students who think it is wrong or very wrong for someone of the same age to use marijuana	62
Table 63. Percentage of students who think their parents would feel it is wrong or very wrong if they used marijuana	63

Other Drugs

Table 64. Percentage of students who ever sniffed glue, breathed contents of spray cans, or inhaled any paints or sprays to get high	64
Table 65. Percentage of students who ever took a prescription pain medicine without a doctor's prescription	65
Table 66. Percentage of students who feel it would be sort of easy or very easy to get drugs like cocaine, LSD, amphetamines, or another illegal drug, if they wanted to	66
Table 67. Percentage of students who think it is wrong or very wrong for someone of the same age to use illegal drugs	67

School, Home, and Other Health Topics

Table 68. Percentage of students who described their grades as mostly A's or B's over the past 12 months	68
Table 69. Percentage of students who say their school grades are better than most students in their class	69
Table 70. Percentage of students who participated in extracurricular activities at school.....	70
Table 71. Percentage of students who think it is important to finish high school	71
Table 72. Percentage of students who did not usually sleep at home during the past 30 days	72
Table 73. Percentage of students who had ever been told by a doctor or nurse that they had asthma	73
